Claim Amendments

1 – 27. Canceled.

28. (New) A method comprising the steps of:

storing, in a mobile communication device, location information for one or more designated geographical areas;

determining, by the mobile communication device, when the mobile communication device is within one of the one or more designated geographical areas;

preventing activation of an audible incoming call indicator in the mobile communication device while the mobile communication device is within one of the one or more designated geographical areas including:

receiving at the mobile communication device a first signal from a supporting exchange representing that the one of the one or more designated geographical areas comprises one or more high traffic areas; and

preventing activation of the audible incoming call indicator in the mobile communication device in response to receipt of the first signal.

29. (new) The method of claim 28 further comprising the step of transmitting to the mobile communication device location information for the one or more first high traffic areas wherein use of audible incoming call indicators is restricted.

3

LUC-309/Akhterzzaman 37-34-21 RCE

30. (new) A method comprising the steps of:

storing, in a mobile communication device, location information for one or more designated geographical areas;

determining, by the mobile communication device, when the mobile communication device is within one of the one or more designated geographical areas; and

preventing one or more outgoing calls from the mobile communication device while the mobile communication device is within one of the one or more designated geographical areas including:

receiving a first signal at the mobile communication device from a supporting exchange representing that the one of the one or more designated geographical areas comprises one or more high traffic areas; and

preventing one or more outgoing calls from the mobile communication device in response to receipt of the first signal.

31. (new) The method of claim 30 further comprising the step of transmitting to the mobile communication device location information for the one or more second high traffic areas wherein outgoing calls are restricted.
